**When fun gives way to terror and a hazing ritual is taken to the limit.**

**A story inspired by an accident that shocked everyone in 2013 and the conspiracy theories that still surround the case.**

Seven undergraduates leave for a weekend getaway to celebrate their ascension into a prestigious academic association. Fun gives way to terror when six of them drown in suspicious circumstances.

Marta, sister of one of the victims, is convinced that the fatal accident was the result of hazing carried out by the association's leader and only survivor, Gonçalo Vilar. Marta's obsession puts her on the trail of the association.

All she wants is to find out what happened that night, but for some reason, they want at all costs to prevent her from getting to the truth.
