HD / 4K

Available Territories

Except for French and German-speaking territories in Europe

OVERVIEW

Dive into the secrets of a unique sea

The team who first filmed the giant squid in its natural habitat in *Legends of the Deep* reassemble for the latest deep-sea exploration in the Red Sea. A team of experts and crew join an expedition by a research institute of Saudi Arabia -- the world's first such research in the Red Sea. Beyond the incredibly clear water, the colorful tropical marine life, and the steep drop of the mega rock cliffs, is the mysterious "brine pool," a second water surface underwater. The pool is said to be close to Earth's early oceans, and may reveal something about the origin of life. Filmed using a UHD camera developed especially for the project, the program captures deep sea images as never before.

ダイオウイカを初撮影した取材班が、未知なる深海のフロンティアに挑む。舞台はサウジアラビア・紅海。極彩色の熱帯魚が群れるサンゴ礁の下は未調査の海域。サウジ政府が行った世界初の紅海深海大調査に参加。目指すのは海底にある謎の湖「ブラインプール」。海底にもう一つの水面が現れ神秘的な光景が広がる。そこは原始の海に近い環境で生命起源の解明につながるという。研究者の探検と神秘的な海底景観に迫る。
