OVERVIEW

A duo of explorers enters an extraordinary gorge in the Himalayas to film an area where no man has ever been. Extremely narrow at little over ten meters but tremendously deep exceeding 200, how the Seti Gorge came to be they say is a "mystery." Looking down, numerous waterfalls tumble into its abyss. Even for the experienced Japanese adventurers, this descent into no-man's land using a single rope is scary. Freezing winter temperatures, torrents of water – a gripping tale unfolds on camera. The latest research reveals the planet's epic saga that created this rare monstrous gorge.

探検の舞台は世界の屋根・ヒマラヤの奇怪な谷。幅はわずか十数メートルだが、深さは実に200メートル以上。雪解け水が幾筋もの滝となり、漆黒の裂け目に流れ込む絶景は息をのむ。世界の溪谷を踏破してきた2人の日本人探検家が、ロープ一本で岩壁を垂直降下。襲いかかる極寒の水の奔流！手に汗握る冒険の一部始終を圧巻の映像で伝える。世界的にも極めて珍しい谷を生んだ壮大な地球のドラマが、最新の科学調査から浮かび上がる。
